PROJECTS

Snorlax - A virtual Voice Assistant

<https://github.com/Yugal308/Snorlax-A-Virtual-Assistant>

- The aim of this project was to develop a Voice Assistance that would cater to all the queries generated by the parents or students at the time of Admission. Since the process of getting Admission is a very tedious task this voice assistance would help in easing out this process.
- Our voice Assistance works with the help of RASA and it utilizes NLP, speech-to-text and text-to-speech functionality.

Netflix Clone

<https://github.com/Yugal308/netflix-clone>

- Made a Netflix Clone with the help of ReactJs, Redux and Firebase. It also includes SignIn and SignUp functionality which is made with the help of FireBase. It also has a Profile page to view your profile and saved movies/shows page where one can save his/her favorite movies.

Expense Tracker

https://github.com/Yugal308/expense_tracker

- Keep track of day to day transactions with this expense Tracker. It is a voice powered expense Tracker where one can add their expense or income through voice. It uses Speechly for voice recognition and addition. The webpage is made with the help of ReactJs.
